Date	Event	Information
30 <sup>th</sup> June	End of term 3	

This week

In Maths, we worked on partitioning numbers into ones, tens and hundreds. We identified which digit was which and made the numbers using diennes and place value arrow cards.

In English, we completed some reading comprehensions linked to our science investigation. We also practiced how to make our sentences longer using *and*, *because*, *but* and *so*.

In science, we conducted an investigation on ice using Izzy the ice cube! It was great fun making predictions and then finding out what happened.

Specialists

Music

We went to the auditorium this week to practice and record our Olympic song, so that we can send it to be mixed into the final edit in the USA! It is sung in a 3 part harmony and that's the first time we have done attempted that, so it was challenging to concentrate on our own parts, but it sounded great so was worth the effort!

Arabic Non-Native

This week, we learned the long and short sound of the letter (Dhaal) (ذ). We wrote the letter, correctly and we learned and practice writing the letter in its different shapes in the word (initial –intermediate- final).

Next week we will learn the letter (Waaw) (و). We will learn how to write the letter in it'.

Islamic Non-Native

This week werevised the stories of Prophet Nuh. Next week we will learn about having respect for our parents.

## PE

This week in KG2, the children have chosen to play rounders again and enjoy the competitive spirit between the 2 teams. These games have encouraged the children to use catching, underarm throwing, speed and agility, to understand the rules of the game better. Great effort KG2!

## Star of the Week

Seals – Ayoub - for his excellent attitude towards learning!

Whale Sharks – Zachary – for working really hard on his phonics and reading.

Octopus – Ryder – for being a kind role model and a great friend.

## The week ahead

Next week, we will be consolidating all the skills we have learned over the year. In English, we will be reading for pleasure as well as testing our comprehension skills. In maths, we will be using our skills to do some problem solving and play games. We will also be designing our castles and will build them with the junk modelling resources we have!

## Reminders

**We are still collecting junk modelling items (cardboard boxes, plastic bottles, etc.) so please send any to school with your child next week.**

**Thanks!**

As always, we thank you for your continued support!
